

Nematollah (Kayhan) Batmanghelich

Contact Information	5607 Baum Boulevard, Fifth floor Pittsburgh, PA 15206-3701 USA Department of Biomedical Informatics University of Pittsburgh	<i>Office:</i> (412) 648-9037 <i>E-mail:</i> kayhan@pitt.edu <i>web:</i> https://kayhan.dbmi.pitt.edu
Objective	Building efficient inference and computational tools to elucidate the statistical connections between imaging, genomics, and medical health records, to improve our understanding of human diseases.	
Research Interests	Medical Vision: Imaging genetics, Computer-aided diagnosis using medical images, Joint modeling of medical images and clinical health records, Computational anatomy. Machine Learning: Graphical models, Deep Learning, Bayesian data analysis, Probabilistic programming, Scalable inference.	
Professional Experience	University of Pittsburgh , Pittsburgh, Pennsylvania Assistant Professor, Department of Biomedical Informatics Secondary, Department of Computer Science Secondary, Department of Electrical Engineering Adjunct, Machine Learning Department, Carnegie Mellon University Areas of Research: Imaging Genetics, Machine Learning for Healthcare	9/2016 – present
	Harvard Medical School , Boston, Massachusetts R25 Research Fellow, Brigham and Women's Hospital, Department of Radiology Supervisor: Prof. Sandy Wells	9/2015 – 9/2016
Education	Massachusetts Institute of Technology , Cambridge, Massachusetts Postdoctoral Associate, Computer Science and Artificial Intelligence Lab Advisor: Prof. Polina Golland Areas of Research: Multimodal Medical Vision, Machine Learning	6/2012 – 9/2015
	University of Pennsylvania , Philadelphia, Pennsylvania PhD in Electrical and System Engineering Advisors: Prof. Christos Davatzikos and Prof. Ben Taskar Thesis: Generative-Discriminative Basis Learning for Medical Imaging Applications	9/2007 – 5/2012
	University of Tehran , Tehran, Iran MSc in Electrical and Computer Engineering Advisor: Prof. Hamid Soltanian-Zadeh Thesis: Atlas-based Segmentation of Brain Structures Using Deformable Models	9/2002 – 9/2005
	Amirkabir University of Technology , Tehran, Iran BSc in Biomedical Engineering Advisor: Prof. Ali Motie Nasrabadi Thesis: Application of Fractal Dimension in Detection of Heart Arrhythmia from Cardiophone	9/1998 – 9/2002
Grants and Awards	NIH R01 HL141813-01 (PI): An Integrative Radiogenomic Approach to Design Genetically-	

Informed Image Biomarker for Characterizing COPD (\$2.8M)	5/2018
SAP (PI): Deep Multi-Domain Learning: A Framework to Incorporate Weak Labels to the Attention Models (\$390,577)	5/2018
Competitive Medical Research Fund (PI): Machine Learning Approach to Characterize COPD using Heritable Image Phenotype (\$40,000)	2017
Pfizer (PI): Developing Statistical Method to Jointly Model Genotype and High Dimensional Phenotype (\$100,000)	2016
NVIDIA Best Paper , Machine Learning in Medical Imaging Workshop in MICCAI	2017
NIH R25 Fellowship , Computer Assisted Interventions for Cancer Treatment, Brigham Women Hospital	2015
Second Place , MICCAI Challenge on Computer-Aided Diagnosis of Dementia based on Structural MRI Data	2014
M+Vision Grant Fellowship , The Madrid-MIT M+Vision Consortium	2013
Travel Award , 3rd Short Course on Statistical Genetics and Genomics	2013
Top 10 Cited article in NeuroImage in 2008	2008
Top 10 Student Papers , International Symposium on Biomedical Imaging	2011
Student Travel Award , 14th MICCAI conference	2011
Travel Grant , Mathematical Problems, Models and Methods in Biomedical Imaging, Institute for Pure and Applied Mathematics (IPAM)	2010
Ranked 90/~8,000 , Nation-wide university entrance exam rank for MSc	2002
Ranked 313/~300,000 , Nation-wide university entrance exam rank for BSc	1998

Invited Talks/ Presentations

February 2018: “Imaging as High dimensional Endophenotype,” Computational Genomics Winter Institute, UCLA, US.

October 2017: “Generative Method to Discover Genetically Driven Image Biomarkers,” Computational Biology Department, CMU, US.

August 2016: “Diversifying Sparsity Using Variational Determinantal Point Processes,” Joint Statistical Meetings, Chicago, US.

June 2016: “Generative Method to Discover Genetically Driven Image Biomarkers,” International Society for Bayesian Analysis, Sardinia, Italy.

July 2015: “Understanding Medical Images Through the Lens of Genetics: a Statistical Modeling Approach,” Imperial College of London, London, UK.

July 2015: “Generative Method to Discover Genetically Driven Image Biomarkers,” International Conference on Information Processing in Medical Imaging (IPMI) Conference, Isle of Skye, Scotland (oral acceptance rate: 10%).

June 2015: “Understanding Medical Images Through the Lens of Genetics: a Statistical Modeling Approach,” Institute for Advanced Application at Geisinger Health System, Danville, US.

May 2015: “Understanding Medical Images Through the Lens of Genetics: a Statistical Modeling Approach,” Statistics in Imaging Section of the American Statistical Association meeting, University of Michigan, Ann Arbor, US.

March 2015: “Understanding Medical Images Through the Lens of Genetics: a Statistical Modeling Approach,” Tufts University, Boston, US.

February 2015: “Imaging Meets the Genetic World: A Joint Modeling Approach,” Applied Statistics Workshop at Harvard University, Cambridge, US.

November 2014: “Imaging Meets the Genetic World: A Joint Modeling Approach,” Computer Science Department colloquium talk, University of Massachusetts, Lowell, US.

June 2013: “Joint Generative Modeling of Imaging and Genetics,” International Conference on Information Processing in Medical Imaging (IPMI) Conference, Asilomar, US (oral acceptance rate: 13%).

July 2013: “Application of Machine Learning in Medical Imaging,” a short course for *M+Vision Fellows*, Madrid, Spain.

April 2010: “Disease Classification and Prediction via Semi-supervised Dimensionality Reduction,” IEEE International Symposium on Biomedical Imaging: From Nano to Macro (ISBI) Conference, Chicago, US.

April 2010: “Application of Regularized Low-Rank Decomposition for Feature Construction in Computational Anatomy,” Massachusetts Institute of Technology, Cambridge, US.

July 2009: “A General and Unifying Framework for Feature Construction, in Image-Based Pattern Classification,” International Conference on Information Processing in Medical Imaging (IPMI) Conference, Williamsburg, US (oral acceptance rate: 17%).

Teaching

Probabilistic Graphical Models, Instructor at the Carnegie Mellon University. 1/2018 – 5/2018
Modern Convex Optimization, Teaching Assistant at the University of Pennsylvania 1/2011 – 4/2011
Modern Convex Optimization, Teaching Assistant at the University of Pennsylvania 1/2009 – 4/2009
Introduction to Optimization Theory, Teaching Assistant at the University of Pennsylvania 9/2008 – 12/2008

Research Experience

Massachusetts Institute of Technology, Cambridge, Massachusetts, USA

Postdoctoral Associate 6/2012 – 9/2016

- **Computer Science and Artificial Intelligence Laboratory (CSAIL)**
 - Constructing a Bayesian model to discover genetic causes of the Alzheimers disease using brain imaging features.
 - Developing a probabilistic model to discover genetically-driven imaging biomarkers for Chronic Obstructive Pulmonary Disease (COPD).
 - Leading a group to develop a distributed optimization method for discriminative pattern learning for COPD using pySpark.
 - Collaborating with Brigham and Women’s Hospital (BWH) on the COPDGene project.
 - Mentoring a student with masters thesis: 3D Texture analysis for characterizing COPD.

University of Pennsylvania, Philadelphia, Pennsylvania, USA

Graduate Student (Research Assistant) 9/2007 – 5/2012

- **Section of Biomedical Image Analysis**
 - Developed a generative-discriminative method to reduce dimensionality in medical images for computational diagnosis.
 - Proposed an efficient optimizer for large-scale problems intended for medical imaging applications.
 - Demonstrated a generative model to analyze abnormal brain deformation due to aging, using nuclear-norm and image warping.
 - Released a software package to construct a customizable generative-discriminative matrix decomposition for medical imaging applications.
 - Developed manifold-based multiparametric study of brain images in order to characterize tissue abnormality in normal-appearing brain tissue in Multiple Sclerosis.

University of Tehran, Tehran, Iran

Graduate Student (Research Assistant) 9/2002 – 12/2005

- **Institute for Studies in Theoretical Physics and Mathematics (IPM)**
 - Developed an energy-based method built on Simplex-mesh, for 3D segmentation of the Hippocampus-Amygdala complex in brain MR images.
 - Developed an approach based on information fusion to guide deformable models for automatic detection and accurate segmentation of brain structures.
 - Proposed an intelligent medial representation model for structural brain segmentation.

Amirkabir University of Technology, Tehran, Iran

Undergraduate Researcher 9/2000 – 9/2002

- Summer internship: Designed an algorithm, for the Philips TM1100 4DSP-core processor to perform real-time high-resolution video image affine transformation.

Professional Experience

GE Representation in Iran (TPP), Tehran, Iran

Hardware R&D Intern for CT-Scan Section 9/2003 – 4/2004

- Developed automatic character recognition software for GE workstation without Digital Imaging and Communications in Medicine (DICOM) capability.

Professional Activities

Program Committee

- MICCAI Program Committee Member
- MICCAI Workshop on Imaging Genetics (MicGen)
- MICCAI Workshop on Medical Computer Vision
- 3rd International Workshop on Pattern Recognition in NeuroImaging (PRNI)
- MICCAI Workshop on Medical Computer Vision

Journal Reviews

- Nature Research
- Bayesian Analysis
- IEEE Transactions on Medical Imaging
- IEEE Transactions on Pattern Analysis & Machine Intelligence
- IEEE Transactions on Biomedical Engineering
- PLOS Computational Biology
- NeuroImage

Conference Reviews

- International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI)
- Conference on Neural Information Processing Systems (NIPS)
- International Conference on Machine Learning (ICML)
- International Conference on Learning Representations (ICLR)
- IEEE International Symposium on Biomedical Imaging
- Workshop on Mathematical Methods in Biomedical Image Analysis (MMBIA)

Publicly Available Software

sHDP

Nonparametric Topic Modeling with Word Vectors. This model enables us to naturally exploit the semantic structures of word embeddings while flexibly discovering the number of topics.

Distributed via: <https://github.com/kayhan-batmanghelich/sHDP>

Role: Developer

GONDOLA

This software provides a generative method to reduce the dimensionality of medical images in a clinically interpretable yet discriminative way.

Distributed via: <http://www.rad.upenn.edu/sbia/software/gondola/>

Role: Developer

BASIS

This is a development environment library with accompanying tools for testing and packaging software across platforms and languages.

Distributed via: <http://www.rad.upenn.edu/sbia/software/basis/>

Role: Tester, Developer
